INTRODUCTION

The following questions are part of the Criminal Justice **Kentucky Treatment Outcome Study or CJKTOS**. CJKTOS is an important part of Kentucky's plan to improve substance abuse treatment. CJKTOS involves collecting information from clients before and after treatment to gain insight into the treatment process and the individuals involved in treatment programs.

CKTOS is a confidential two part survey.

Part one is a face-to-face interview with your counselor completed as part of your treatment intake process and takes about 30 minutes. You will answer a series of questions about physical and mental health, education and employment, substance use, legal involvement, and recovery support.

Part two is a phone interview about 12 months from now. At the end of part one, you'll be asked to volunteer for the second half of the study. If you agree, your name will be included in the pool of clients who may get a phone call from the **University of Kentucky Health Follow-up Study** to answer similar questions in about one year. Clients who complete the **second half of the survey** are sent a "thank you" check for **\$20** from the University of Kentucky.

It is very important for you to know that **all of your Follow-Up Interview information is confidential**. Your name will never be reported or even linked with the answers given in the follow-up survey. When we write up reports they include overall findings about the entire group of participants, not individuals. We have a **Federal Certificate of Confidentiality that prohibits us from ever revealing information about a person, even under a court order**. Your responses to the follow-up survey questions are well protected.

Your participation also helps improve future treatment for others and provides important information about the experiences of people in substance abuse treatment.

Section A. BASIC CLIENT INFORMATION

These first few questions are basic questions we need to get the interview started.

1. What is your gender?
1 = Male

- 2 = Female
- 3 = Transgender (male to female)
- 4 = Transgender (female to male)

2. What race /ethnicity do you consider yourself to be? **Select ALL that apply.**

Section G. RECOVERY SUPPORTS

The final set of questions is about the recovery support you currently have available to you. Recovery supports are important to understand the recovery process over time.

1. In the 30 days prior to this incarceration, how many times did you attend **AA, NA, MA or other self-help group meetings** (count # of meetings attended)? _____ meetings
2. Did you have contact with an AA, NA, MA or other sponsor in the 30 days prior to this incarceration? 0 = No 1 = Yes 2 = Don't have a sponsor
3. In the 30 days prior to this incarceration, did you have contact with family or friends who were supportive of your recovery? 0 = No 1 = Yes
4. In the 30 days prior to this incarceration, how many people could you count on for recovery support when you needed it? _____ people
5. **Besides substance abuse treatment**, what are the next two most useful things you believe will help you in getting or staying off illicit drugs or alcohol?
Select up to TWO answers.
 - Employment
 - Counseling
 - Self Help (*this refers to programs or services like AA or NA*)
 - My faith or religion
 - Other people in recovery
 - Support from family
 - Support from friends
 - Support from a partner (boy/girlfriend, spouse)
 - Children (being responsible for dependents)
 - The need to stay out of jail or prison
 - Change in environment (staying away from certain people, places)
 - Staying busy/keeping occupied
 - Will power/self-talk/wanting it for myself (determination, motivation)
 - Remembering the past/consequences
 - Other, please specify: _____
6. Based on what you know about yourself and your situation, how good are the chances that you can get off and stay off drugs/alcohol?
 - 1 = Very poor
 - 2 = Moderately poor
 - 3 = Uncertain
 - 4 = Moderately good
 - 5 = Very good

FOLLOW-UP STUDY STATUS

Part Two of CJKTOS is a second 20 minute telephone interview that takes place in about **12 months** post-release.

The **University of Kentucky** is responsible for interviews in **Part Two of CJKTOS**. When they call you for a follow-up phone interview, they remind you that this is part two of the “**UK Health Follow-up Study**.” The interviewers never reveal your identity or that you were in substance abuse treatment. Clients who complete the **second half of the survey** are sent a “thank you” check for **\$20** from the University of Kentucky.

Remember, **all of your follow-up information is confidential**. Your name will never be reported by UK or linked with the answers given in these surveys. When reports are written, they include overall findings about the entire group of participants, not individuals. UK has a **Federal Certificate of Confidentiality** that prohibits revealing information about a person **even with a court order**. Your responses to these questions are well protected.

Please read over the consent form and decide if you'd be willing to complete Part Two of CJKTOS in about 12 months.

UK HEALTH FOLLOW-UP STUDY

WHY ARE YOU BEING ASKED TO TAKE PART IN THIS RESEARCH?

You are being invited to take part in a follow-up treatment outcome study because you are a client of a state-funded substance abuse treatment program (SAP) in a correctional facility, local detention center, community custody or intensive outpatient program while under Kentucky Department of Corrections supervision. If you take part in this study, you will be one of about 4,000 people per year to do so. This research study is separate from your taking part in counseling services in the substance abuse treatment program and your taking part in the study is not required for admission to the program.

WHO IS DOING THE STUDY?

The Principal Investigator in charge of the study is Dr. Michele Staton Tindall, who is an Associate Professor at the University of Kentucky. Robert Walker, M.S.W., L.C.S.W., Dr. Carl Leukefeld, Erin McNees Winston, M.P.A. and Jeb Messer also work with the study. Other professionals who work with the investigators as study staff may assist them or act for them.

WHAT IS THE PURPOSE OF THIS STUDY?

The purpose of this study is to gather information about substance abuse and related mental health problems, employment, education, legal status, and previous use of health and treatment services. It is also for the purpose of evaluating the outcomes of the services that you receive.

WHERE IS THE STUDY GOING TO TAKE PLACE AND HOW LONG WILL IT LAST?

When you are being interviewed early in the admission to the substance abuse program, your counselor will collect clinical information from you. Part of the information for this study will be collected during one of those interviews. The other part is collected approximately 12 months after your baseline interview or release from the correctional facility. We may contact you by telephone for a follow-up interview using the contact information you give us in your counselor interview. For both the counselor interview and our call to you, the total amount of time for this study is about 1 hour over the next year.

If you are invited to participate in a one-time study voluntary focus group, the group will take place in the prison and will last about 1 hour.

WHAT WILL YOU BE ASKED TO DO?

You will be asked to answer questions about related mental health problems, employment, education, legal status, and previous use of health and treatment services. Your counselor will ask you these questions, but you will not be asked to take part in any experimental treatments or procedures.

You will also be asked to give the names, addresses, and phone numbers of two contact persons who would be most likely to know how to reach you at the time of follow-up 12 months after your baseline interview or post-release. In addition, we may attempt to contact your community social service clinician for your updated address or phone number after you are released. You may be contacted while you are still in the corrections facility to update your locator information so we can reach you 12 months after your baseline interview or post-release. The research team may also use other internet searches and social media sites like Facebook to try to find you for the follow-up. Your decision to enroll in any study related social media site is completely voluntary and your contact information will not be shared with any other study participant. Sites like Facebook (if you are a member) will just be used to send you notifications about your follow-up interview. Twelve months after your baseline interview or release, you may be called for a follow-up interview by telephone and you will be asked some of the same questions that are asked by your counselor. This telephone call interview takes about 20 minutes. In general, we usually contact about 20% of the persons who agree to participate in the follow-up study so your chances are about one in five of being contacted 12 months after your baseline interview or post-release. If you are also participating in other services provided by DOC such as the BJA-funded family-based program, you may be asked to participate in a 6-month as well as the standard 12-month follow-up interviews. All participants in these BJA services will be asked to participate in the 6-month follow-up interviews, while only a sample will be asked to be in the 12-month interviews.

You also may be invited to take part in a one-time voluntary focus group where you will be asked general questions about drug use, mental health, family, service options, and how helpful the program may be in addressing these issues, as well as how it may be improved. The groups will consist of a series of open-ended questions and will

be audio recorded, if you agree, to ensure that we capture all the responses in the group. If you are invited to participate in the one-time study voluntary focus group, the group will take place in the prison and will last about 1 hour.

You are also asked to let the researchers use state information about the number and types of state-funded services that you received. In addition, you are being asked to let University of Kentucky researchers look at public records of arrests and court events that have involved you. This information will help researchers evaluate the services you receive.

ARE THERE REASONS WHY YOU SHOULD NOT TAKE PART IN THIS STUDY?

There are no conditions that would keep you from taking part in this study.

WHAT ARE THE POSSIBLE RISKS AND DISCOMFORTS?

There are no known risks to your health or mental health associated with these interview procedures. It is perhaps possible that the questions will cause you some emotional discomfort since they might cause you to remember times when you were unhappy or under stress. For your first interview, you can talk about this discomfort with your SAP counselor. Also, some people may be uncomfortable talking about confidential information. Because of the steps we have taken to protect your privacy, the risk of unauthorized disclosure is minimal. If you have some discomfort, you will be offered referral to counselors in your area.

However, if you are living in a treatment facility, institution or prison when contacted for a follow-up interview there is always a risk that your interview could be overheard by facility staff. University of Kentucky researchers will make every effort to minimize this risk by asking that the follow-up interview be conducted in a confidential setting over a secure phone line.

Your participation or non-participation will not be reported to the parole board or court to affect your parole or status.

WILL YOU BENEFIT FROM TAKING PART IN THIS STUDY?

Some people find it helpful to be interviewed about their lives and their substance use because it helps them see their health in a different light. Also, these questions about substance use might help you see a need for change and this can be a benefit. However, there are no direct benefits to you for taking part in the follow-up study.

DO YOU HAVE TO TAKE PART IN THIS STUDY?

If you decide to take part in this follow-up study, it should be because you really want to volunteer. You will not lose any benefits or rights you would normally have if you choose not to volunteer. You can stop at any time during the study and still be in good standing with the substance abuse treatment program.

IF YOU DON'T WANT TO TAKE PART IN THE STUDY, ARE THERE OTHER CHOICES?

If you do not want to take part in the follow-up study, there are no other choices except to not take part in the study.

WHAT WILL IT COST YOU TO TAKE PART IN THIS STUDY?

You will not be charged fees for any of the activities or procedures used in this study. The fees for your participation in the substance abuse treatment program will not be increased or reduced because of your taking part in this study.

WHO WILL SEE THE INFORMATION THAT YOU GIVE?

Because of the steps we have taken to protect your privacy, the risk of unauthorized disclosure of follow-up interview information is minimal. Your information will be combined with information from other people taking part in the study. When we write about the study to share it with other researchers, we will write about the combined information we have gathered. You will not be identified in these written materials. We may publish the results of this study; however, we will keep your name and other identifying information private. Your counselor will ask for your social security number but it will be encrypted to keep it secure and protected. This number helps us match all information clearly to your file; however, if you do not want to give us your social security number, you can still take part in the study. When we contact you 6 or 12 months after your baseline interview or release, your personal information will not be shared with the Department of Corrections or the Parole Board.

We have obtained a Confidentiality Certificate from the US Department of Health and Human Services (DHHS) to protect the researchers from being forced, even by a court order or subpoena, to identify you. (The Confidentiality Certificate does not imply approval or disapproval of the project by the Secretary of DHHS.) You should

know, however, that we may provide information to appropriate individuals or agencies if harm to you, harm to others or child abuse becomes a concern. In addition, the agency funding this research (The Kentucky Department of Corrections) and the staff of the University of Kentucky may also see your information if necessary.

CAN YOUR TAKING PART IN THE STUDY END EARLY?

If you decide to take part in the study you still have the right to decide at any time that you no longer want to continue. You have the right to skip questions, terminate your participation at any time, and skip any part of the study, including the focus group. You will not be treated differently if you decide to stop taking part in the study. The individuals conducting the study may need to withdraw you from the study. This may occur if you are not able to follow the directions they give you, if they find that your being in the study is of more risk than benefit to you, or if the agency funding the study decides to stop the study early for a variety of reasons.

WHAT HAPPENS IF YOU GET HURT OR SICK DURING THE STUDY?

If you believe you are hurt or become ill because of something that is done as a part of participating in the follow-up interviews you should call Dr. Michele Staton Tindall at 859-257-2483 immediately. It is important for you to understand that the University of Kentucky will not pay for the cost of any care or treatment that might be necessary because you get hurt or become ill as part of participating in this study. That cost will be your responsibility. Also the University of Kentucky will not pay for any wages you may lose if you are harmed by this study. Health care providers are not allowed to bill your insurance company, Medicare, or Medicaid for these costs without first getting permission. If you have questions about any aspect of evaluation-related costs, you should ask the insurer or party who covers the costs of your treatment. The party that covers these costs may be the state of Kentucky and your counselor can answer questions about this source of treatment funding.

WILL YOU RECEIVE ANY REWARDS FOR TAKING PART IN THIS STUDY?

If you are selected for participation in a 12-month follow-up interview, you will receive \$20.00. If you are participating in the family-based program, you will also receive \$20.00 for the six month follow-up interview. In order to get the \$20.00 you must take part in the follow-up interviews, and then payment will be mailed to you. If you choose to participate in any interview but do not complete the interview, your payment will be based on the time of participation.

If you are invited and actually participate in a one-time voluntary study focus group, you will be paid an additional \$10.

WHAT IF YOU HAVE QUESTIONS?

Before you decide whether to participate in this follow-up study, please ask any questions that might come to mind now. Later, if you have questions about the study, you can contact the investigator, Dr. Michele Staton Tindall at 859-257-2483 or the Study Director, Erin McNees Winston at 859-257-1720. If you have any questions about your rights as a volunteer in this research, contact the staff in the Office of Research Integrity at the University of Kentucky at 859-257-9428 or toll-free at 1-866-400-9428. We will give you a copy of this consent form to take with you.

WHAT ELSE DO YOU NEED TO KNOW?

This study is funded by the Kentucky Department of Corrections to better understand the treatment of substance abuse in state-funded programs. You will be told if any new information is learned which may influence your willingness to continue taking part in this study.

FOLLOW-UP CONDITIONS

I also understand that 12 months after baseline interview or post-release, when the University is contacting me for a follow-up interview, I may be living in a treatment facility, institution, or prison. I consent to being contacted in any of these facilities if the University has located me for an interview.

(Check One) _____ Yes _____ No

If client answers “I do NOT agree”

Thank you for answering these questions. Your information helps improve substance abuse treatment in Kentucky.

If client answers “I Agree”

Thank you for agreeing to be in the follow-up study! The last part of the survey asks for some simple locator information that is important to help the UK Health Follow-up Study call you for the second interview. UK will use this information ONLY to locate you for a follow-up interview. Like all the rest of the responses you have just given, the locator information is stored encrypted in a password-protected file to which only approved study staff has access.

Please provide as much information as possible so that you can be contacted in 12 months for Part Two of CJKTOS, the UK Health Follow-up Study.
