

RCOS University of Kentucky Health Study

August 2013

What will I do?

This is a two part study.

You will do the first part online when you start Phase I at the Recovery Center.

During the online interview you will tell us about your:

- Goals for recovery
- Substance abuse history
- Past and current health
- Job history

About 12 months after the Phase I interview, we may contact you to do the second part over the phone.

During the phone interview, you will:

- Tell us what you liked and didn't like about your experience
- Tell us how you think the program could be better
- Tell us how you are doing now

Why should I sign up?

Your opinions matter. Everyone has a different recovery experience and we want to hear about yours!

After you finish the second part of the survey, the University of Kentucky will send you a \$20 check as a thank you for your time.

For just 20 minutes of your time, you can help make Recovery Centers in Kentucky better.

Who will see my answers?

No one.

Not even your family, probation/parole officer, or employer will know what you say. Your name is never attached to your answers so they can't be traced back to you.

Why should I trust my information will stay private?

UK has a **Federal Certificate of Confidentiality** for this project. This means we can't be forced to give out your information, even under a court subpoena.

How do I sign up?

All we need is:

- Your agreement to be in the study
- The best phone number to reach you
- An address where you get mail

None of your information is ever given out and we are not a part of the Recovery Center.

How do I know this is real?

Check out our website cdar.uky.edu/rcos

Or you can call Dr. TK Logan at 1-866-972-9682 with any questions or concerns

Many others, just like you, have already shared their thoughts and opinions.

Join them today!
