What is Girls in Research?

- A three-year program designed to introduce middle-school girls from southeastern Kentucky to careers in drug and alcohol research.

Involves:

- A one-week camp at the University of Kentucky for three consecutive summers.
- Five Saturday academies throughout the school year for three years at local community colleges.
- Mentoring relationships with a University of Kentucky scientific mentor and a local community mentor.

Who can participate?

Participants enter the “Girls in Research” program the summer prior to 6th grade and remain in the program through the end of the 8th grade.

The program is available for students who reside in the following counties:

Selection Criteria:

- Academic Achievement, especially in science and math
- Participation in extra-curricular activities
- Participation in community volunteer activities
- Ability to articulate a career goal
- Strength of personal references

Program Details:

- Classes in science
- Free meals and lodging
- Educational and recreational trips
- A $100 stipend upon completion of each summer session
- A $1000 stipend for the college of your choice upon completion of the three-year program

SUMMER PROGRAM DATES FOR 2005

- June 5th — 10th
- June 12th — 17th
- June 19th — 24th
